DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 5-24, and 26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims **1, 5-24, and 26** are rejected under 35 U.S.C. 102(e) as being by anticipated **Gray (US Pub No: 2001/0037312)**.

Regarding claim 1, Gray discloses a method in a user equipment for enabling use thereof in electronic transactions (figures 1, transaction system 100) said user equipment having transaction means for conducting a transaction with a merchant entity (page 3, par. [0023], [0029]), the method comprising: receiving at the user equipment control information from a management entity independent of the merchant entity (page 3, par. [0021], [0023]); and updating the transaction means

based on the received control information to make it compatible with said merchant entity after a change in the transaction mechanism thereof (page 1, par. [0010]; page 4, par. [0035-0036]).

Regarding claim 5, Gray further discloses a method as claimed in claim 1, wherein at least one parameter for use in electronic transactions by the user equipment is changed based on said information from the management entity (page 3, par. [0027-0028]).

Regarding claim 6, Gray further discloses a method as claimed in claim 1, wherein the transaction means are initiated at the user equipment based on said information from the management entity (page 1, par. [0010]).

Regarding claims 7, 8, Gray further discloses wherein the user equipment is provided with hardware for the transaction means during the manufacture thereof (page 1, par. [0006-0007]).

Regarding claim 9, Gray further discloses a method as claimed in claim 1, wherein the information from the management entity provides the user equipment with at least one new parameter for use in electronic transactions (page 2, par. [0014]).

Regarding claim 10, Gray further discloses a method as claimed in claim 1, wherein the user equipment generates a message requesting for a modification of the transaction means (page 2, par. [0014]).

Regarding claims 11, 12, Gray further discloses a method as claimed in claim 1 (page 3, par. [0023], [0028]).

Regarding claim 13, Gray further discloses a method as claimed in claim 11, wherein the data entity is based on an electronic data card format (page 3, par. [0028]).

Regarding claim 14, Gray further discloses a method as claimed in claim 11, wherein said information is inserted in a data field of the data entity (page 3, par. [0029]).

Regarding claim 15, Gray further discloses a method as claimed in claim 11, wherein the data entity is based on a format that has been selected from a list comprising of: an electronic business card format; an electronic calendar format; an electronic commerce modeling language format. See (page 3, par. [0028]).

Regarding claim 16, Gray further discloses a method as claimed in claim 1, wherein the communication media between the user equipment and the service management entity comprises an interface that is based on at least one of the following: short message service (SMS); wireless application protocol (WAP);

internet protocol (IP); a short range radio link; a proximity card type interface; an infrared link. See (page 1, par. [0020]).

Regarding claim 17, Gray further discloses a method as claimed in claim 1, wherein the user equipment communicates with a base station of a cellular communication network (page 2, par. [0020] “user equipment such as cellular phone has to communicates with a base station”).

Regarding claim 18, Gray further discloses a method as claimed in claim 1, wherein said information is transmitted to the user equipment in a message containing also other information (page 3, par. [0021]).

Regarding claim 19, Gray further discloses a method as claimed in claim 1, comprising a step of storing said information associated with provisioning of the transaction means at the user equipment (page 3, par. [0021-0023]).

Regarding claim 20, Gray further discloses a method as claimed in claim 1, wherein said information is transmitted to the user equipment in association with exchange of transaction information between the user equipment and a service provider (page 2, par. [0012]).

Regarding claim 21, 26, Gray discloses an arrangement for processing electronic transactions (Fig. 1, transaction system 100) comprising: a user equipment (Fig. 1, item 110); a transaction service entity of a credit card issuer “page 3, par. [0021]”

adapted to generate control information to be transported to the user equipment (page 3, par. [0022-0023]); and communication means for communication between the user equipment and the transaction service entity (page 3, par. [0022-0023]), and transaction means in said user equipment (page 3, par. [0024]); wherein the arrangement is such that the configuration of said transaction means in said user equipment can be changed based on said control information transported to the user equipment via said communication means (page 4, par. [0034-0035]).

Regarding claim 22, Gray further discloses an arrangement as claimed in claim 21 adapted to modify existing transaction means based on said control information (page 4, par. [0032]).

Regarding claim 23, Gray further discloses an arrangement as claimed in claim 21 adapted to initiate transaction means based on said control information (page 1, par. [0010]).

Regarding claim 24, Gray further discloses an arrangement as claimed in claim 21, wherein the user equipment is provided with means for wireless communication with a co-operative device (page 3, par. [0030]).
